

Oracle AI Adventure in Finance

Hands-on experience of Oracle Applications with Built-in AI

#OracleAIAdventure in Finance is an interactive, hands-on experience that lets you explore how Oracle's latest AI-powered finance capabilities are unlocking new potentials and transforming the nature of work.

Where: AI Adventure is delivered at Oracle, customer, or partner-hosted locations and events & conferences.

How: Participants "test-drive" day-in-the-life scenarios, dive into touchless business processes and advanced analytics, and see firsthand how Oracle's AI Advantage is shaping the future of finance.

What:

User & Mobile Experience: Immerse in a modern, intuitive UI & work smarter on the go with AI-enabled capabilities that simplify tasks, surface insights, and accelerate decisions.

Touchless Expenses: Transform expenses into a touchless, secure, and auditable flow—from credit card integration to policy application and audit—freeing teams to focus on outcomes over paperwork.

Predictive Insights: AI-driven operational and executive analytics that surface trends, risks, and opportunities proactively—accelerating time to decision and action.

Smart Spend: Full visibility across source-to-settle with GenAI-driven supplier recommendations, assisted authoring, AI ingestion of purchasing docs/invoices for touchless AP, auto coding and dynamic discounting to unlock cash.

AI Agent Studio: See how easy it is to leverage, modify, and create AI agents—no code required—to fit your policies, controls, and business goals, enabling "digital co-workers" across finance flows.

Intelligent Project Management: Streamline project communications and automate PM work with GenAI—from change orders and program status summaries to proposal creation—improving execution consistency and financial clarity.

Cash Optimization: Experience touchless payables, predictive cash forecasts, and dynamic payment programs—with agentic flows, bank and supplier integration, and human-in-the-loop approvals to maximize savings and working capital.

Advanced Planning: Elevate planning with multi-variant predictive forecasting, scenario modeling, and guided variance analysis. Iterate plans quickly, collaborate securely, and turn signals into strategy with AI-assisted insights and narrative.

Intelligent Accounting & Close: Close faster with fewer exceptions with AI-orchestrated processes. Use AI-agents to monitor key accounts, automate reconciliations, and standardize period-end tasks.

Smart Governance: Reduce time, risk, and cost with AI-driven security, audit, and fraud monitoring. Design-in effective controls, streamline compliance, and continuously monitor business health.

Story Behind the Numbers: Turn live financials into decisions with secure data links and AI-assisted summaries, narratives, natural-language navigation, and predictive insights—leaders get the "why" fast, governed, and ready to act.

Why: Experience how Oracle's built-in AI unlocks new efficiencies with digital co-workers, elevates user experience, transforms data into actionable insights, and enhances decision-making, security, and productivity.

Who: CAOs, Controllers, VPs of Finance, Accounting/Finance Managers, Business Analysts, and Power Users

Benefits: Walk away with a practical understanding of how Oracle's built-in AI delivers real business impact—equipping you to reimagine finance processes with confidence and excitement.
