

Oracle AI Adventure in Supply Chain

Hands-on experience of Oracle Applications with Built-in AI

#OracleAIAdventure in Supply Chain is an interactive, hands-on experience that lets you explore how Oracle's latest AI-powered Supply Chain capabilities are unlocking new potentials and transforming the nature of work.

Where: AI Adventure is delivered at Oracle, customer, or partner-hosted locations and events & conferences.

How: Participants "test-drive" day-in-the-life scenarios, dive into touchless business processes and advanced analytics, and see firsthand how Oracle's AI Advantage is shaping the future of Supply Chain.

What:

User & Mobile Experience: Immerse in a modern, intuitive UI & work smarter on the go with AI-enabled capabilities that simplify tasks, surface insights, and accelerate decisions.

Supply Chain Command Center: Empower leaders to swiftly detect, decide, and execute on business conditions, enhancing decision-making and driving bottom-line results.

AI Agents: Embedded within Fusion Cloud Applications, AI Agents automate workflows and deliver predictive insights to enhance decision-making and operational efficiency.

Maintenance Advisor: AI Agent empowers maintenance teams by providing instant access to service histories, knowledge articles, and corrective action recommendations, streamlining asset repair and maintenance processes.

Physical AI in the Warehouse: AI-driven logistics operations, integrated with Fusion Supply Chain Applications, enhance operational efficiency by automating tasks, optimizing inventory, and providing real-time insights for proactive decision-making.

Order Orchestration: Streamline complex order fulfillment by automating processes, enhancing visibility, and ensuring timely, accurate deliveries to boost customer satisfaction and operational efficiency.

Advanced Inventory: enhances warehouse operations by automating tasks, optimizing inventory, and accelerating order fulfillment, improving efficiency and decision-making

Why: Experience how Oracle's built-in AI unlocks new efficiencies with digital co-workers, elevates user experience, transforms data into actionable insights, and enhances decision-making, security, and productivity.

Who: COOs, VPs of Supply Chain, VPs of Logistics, Supply Chain Managers, Business Analysts, and Power Users

Benefits: Walk away with a practical understanding of how Oracle's built-in AI delivers real business impact—equipping you to reimagine Supply Chain processes with confidence and excitement.
